Project name:- Actimed
Tools & technology:- Symfony framework 4.4
Description:- This system has been developed for Ecommerce (B2C)

Project name:- Allyhut
Tools & technology:- Symfony framework 2.8
Description:- Connect with your affiliate network and make your products available though your own affiliate center hosted on your own domain.
Customize the center with your own logo, a nice welcome message and a video to greet your affiliates and tell them why they should promote your product.
Easily check the commission history stats for a given product or offer. See the total number of affiliates, commissions and sales generated by this product for the whole year. You'll also get a list of your top-performing affiliates to drive even more sales to your other products!

Project name:- Dgac
Tools & technology:- Symfony framework 2.3
Description:- This one is Reservation system for traveller and driver check all reservation date wise and take passenger and inform to another driver. Admin can manage all route assign driver to particular trip of traveller.

Project name:- RewardBurst
Tools & technology:- Symfony framework 2.8
Description:- RewardBurst is also one of small application for engaging customer with membership and coachrack sites.

It has following features.
1. Create Digital Product :- add your other digital products in the form of PDF files, videos, or audios and decide how many points are required to download each product. Build a store for your existing members.

2. Reward Members :- reward your members by giving them points when they post a comment, complete on a lesson, watch a video, or simply login to your membership site. Intent is to let them accumulate more and more points.

3. Monetize :- Let your members download the digital products by redeeming their points.
When they run out of points, offer them to buy additional points from you. The smartest strategy to monetize from your existing customers.
